

Avoid Safety Mishaps—protect your employees and the food you serve

Box cutters are a necessity for every kitchen. Why not use the safest tool available?

The last thing you want to hear is that an employee has been injured or a blade is missing and might be in the food you are serving.

The RAZE® Restaurant Cutter has been designed with safety-first features to help avoid these kitchen catastrophes.

The RAZE® Disposable Safety Cutter features

- Non-removable safety blade—remains in the cutter
- Blunt tip stainless steel safety blade—less likely to cause injury
- Safety spring-back design—clear safety guard automatically re-locks after each cut
- Tape splitter for blade-less tape splitting—reduces potential damage to user and merchandise
- Comfortable ergonomic shape for better leverage and less strain—lightweight feel
- Valued priced

One RAZE® fits all

The RAZE® Disposable Safety Cutter with Tape Splitter has two-button activation for right or left-handed users plus a third button for top power cuts! Guard will not retract unless one of the 3 buttons is depressed.

One-time release automatically prevents slip-off cuts. Push once to cut and cutter resets its hood automatically.

Our NEW RAZE® Safety Cutter—an indispensable tool for every kitchen

NSF® Certified Food Safe for use as a food service tool.

Order No. 954935

The Pocket Cutter™ is so safe you can literally keep it in your pocket

The Pocket Cutter™ design protects you before, during and after the cut

- The concealed blade stays in a locked position in the body—only engages when the black safety trigger is squeezed
- Once engaged, the blade mechanism senses the surface being cut and instantly activates the automatic safety return system
- When the cut is complete, the safety return system overrides the squeeze trigger and automatically returns the blade to a concealed position

The Pocket Cutter

- Disposable—no blade changes required
- Long lasting—cuts up to 5,000 linear feet. Three times longer than many other disposable cutters
- Non breaking steel blade—no risk of misplaced blades
- Fits both left and right handed users
- Handy pocket/belt clip slips over pocket or belt loop
- Packaged three per bag
