

MonarchNet2™ Enterprise Printer Management System

Network Control

Monarch®
Products and Services

MonarchNet2 Enterprise Printer Management System allows you to improve efficiency by providing complete visibility and command of networked printers from one central location.

Printers can be managed from one control point, whether they're in a distribution center in Kokomo, a manufacturing location in Singapore or on a cart on a retail floor in Kalamazoo.

The Perfect Fit

MonarchNet2 is perfect for these applications:

- **Multiple printers on your enterprise system.** Update them all with a single keystroke! Synchronize software automatically! Rotate security keys!
- **Printers at remote locations.** Manage all your printer settings from one location! With all printers maintaining the same setting, there is no need for the operator to make changes.
- **Walk a remote operator through a keying sequence.** Use the virtual keypad to help the operator navigate to the correct sub-menu to make individual changes.

Instant Alerts

MonarchNet2 can be set up to send e-mail alerts to the system administrator based upon criteria chosen by the administrator. If the printer runs out of supplies or is taken off-line, it can send an e-mail alert to the administrator's cell phone or pager!

SNMP Support

MonarchNet2 supports Simple Network Management Protocol (SNMP), an industry standard connectivity protocol that allows easy integration to commercially available software packages.

RFID Printing

The Monarch® Smart Relay™ System, built on MonarchNet2 technology, automatically manages your mixed labeling environments to improve productivity and reduce waste when printing both RFID and non-RFID labels within the same application.

MonarchNet2™ Enterprise Printer Management System

Monarch®
Products and Services

Network Management at Your Fingertips

MonarchNet2 is the most advanced tool available to manage your worldwide Monarch® printer network efficiently and quickly from a single location!

MonarchNet2 is comprised of three components:

1. The Model 7411 Ethernet Print Server or Dual Wired and Wireless 802.11b/g Print Server.
2. Powerful firmware inside the Monarch® 9855™ and 9860™ printers to support the latest in networking technology.
3. An extremely user-friendly

graphical software package that runs on Windows 95/98/2000/NT, Netware, Novell, Unix, or Linux that is packed full of features to provide you complete and instant management and visibility of all MonarchNet2 enabled printers on your network.

One System, Many Views

With MonarchNet2, you can view the status of all the printers in your enterprise using a clear, two-line display screen. Diagnose problems instantly without leaving your office. No need to know the specifications of MPCL status polling - MonarchNet2 manages this

for you. Use the grouping feature to update all your printers at one time and the virtual keypad to control the printers from your desk at headquarters.

Network Control Language Support

Text based initialization files allow you to clone and control printer settings automatically without the need to understand the printer control language.

Our network control language files allow complete control of all printer configurations, including firmware versions.

Features and Specs at a Glance

- Centralized Visibility of Printers
- Flexible Interface to Support Multiple Networking and Operating Systems
- Instant Alerts
- Configuration Control

Operating Systems:

- Windows 95/98/2000, Windows NT, XP or Vista
- Novell
- NetWare
- Linux
- Unix
- NDS

Protocols:

- SNMP
- HPJetAdmin
- Telnet
- FTP
- TFTP
- WINS
- DHCP
- RSH or REMSH

Transport Layers:

- TCP/IP
- IPX/SPX
- Appeware

Monarch® Supplies: For smooth and reliable performance, only Monarch supplies are recommended for use with Monarch printers. Our labels scan virtually 100% of the time, cutting wasted rescanning and labeling time.

Monarch® Service: Every Monarch printer is fully supported by Monarch Nationwide Service, the largest network of experienced, full-time bar code and RFID technicians in the industry.
